

City of Hendersonville, NC
Ground Fault
In compliance with: 29 CFR 1926.404(b)(1)

I. Purpose

OSHA standard 29 CFR 1926.404(b)(1) states that each employer shall provide its workers who are engaged in construction activities with either a ground-fault current interrupter or an Assured Grounding Conductor Program to protect employees who use cord-and-plug-connected tools and cord sets that are not a permanent part of the wiring of a building.

To meet this standard the City will provide that a ground-fault current interrupter (GFCI) will be used whenever electrical plug and cord connected equipment or extension cord sets are used during construction activities.
